

**DECENTRALISED PROCEDURE**

**PUBLICLY AVAILABLE ASSESSMENT REPORT FOR A  
VETERINARY MEDICINAL PRODUCT**

**Auriotic ear drops and cutaneous suspension for dogs and cats  
(AT, UK)  
Auriculo-canis ear drops and cutaneous suspension for dogs and cats  
(FR)**

**Date:** 25.09.2020

**Modules 1-3 reflect the scientific discussion for the approval of Auriotic ear drops and cutaneous suspension for dogs and cats. The procedure was finalised on 27.07.2020. For information on changes after this date please refer to module 4.**

**MODULE 1****PRODUCT SUMMARY**

EU procedure number	AT/V/0027/001/DC
Name, strength and pharmaceutical form	Auriotic, 23.0 mg/ml, 5.0 mg/ml, 0.5293 mg/ml, ear drops and cutaneous suspension
Applicant	Richter Pharma AG Feldgasse 19 4600 Wels Austria
Active substances	Miconazole nitrate Prednisolone acetate Polymyxin B sulfate
ATCvet code	QS02CA01
Target species	Dogs and cats
Indications for use	<p>For the treatment of otitis externa and small localised superficial skin infections in dogs and cats caused by infections with the following miconazole and polymyxin B sensitive bacteria and fungi:</p> <ul style="list-style-type: none"> <li>• Gram-positive bacteria</li> <li>- <i>Staphylococcus spp.</i></li> <li>- <i>Streptococcus spp.</i></li> <li>• Gram-negative bacteria</li> <li>- <i>Pseudomonas spp.</i></li> <li>- <i>Escherichia coli</i></li> <li>• Fungi</li> <li>- <i>Malassezia pachydermatis</i></li> <li>- <i>Candida spp.</i></li> <li>- <i>Microsporum spp.</i></li> <li>- <i>Trichophyton spp.</i></li> </ul> <p>Treatment of <i>Otodectes cynotis</i> (ear mites) infestations where there is concurrent infection with miconazole and polymyxin B sensitive pathogens.</p>

## **MODULE 2**

The Summary of Product Characteristics (SPC) for this product is available on the Heads of Veterinary Medicines Agencies website (<http://www.HMA.eu>).

## MODULE 3

### PUBLIC ASSESSMENT REPORT

Legal basis of original application	Generic application in accordance with Article 13(1) of Directive 2001/82/EC as amended
Reference medicinal product	Surolan 5,0 mg/0,5293 mg/23,0 mg/ml, Ohrentropfen, Suspension zur Anwendung auf der Haut für Hunde und Katzen
Date of completion of the original decentralised procedure	27.07.2020
Concerned Member States for original procedure	FR, UK

#### I. SCIENTIFIC OVERVIEW

Auriotic ear drops and cutaneous suspension was a decentralised application in accordance with Article 13(1) of Directive No 2001/82/EC as amended (a generic application) with AT as Reference Member State and end of procedure was on 27<sup>th</sup> July 2020. Concerned member states were FR and UK. The reference product was first authorised in Austria on 22<sup>th</sup> December 1978 on the basis of a full application.

Further, for the sake of completeness, it should be mentioned that Auriotic is a duplicate application to Mitex ear drops and cutaneous suspension for dogs and cats (AT/V/0014/001/DC).

The indication is for the treatment of otitis externa and small localised superficial skin infections in dogs and cats caused by infections with miconazole and polymyxin B sensitive bacteria and fungi and for treatment of *Otodectes cynotis* infestations where there is concurrent infection with miconazole and polymyxin B sensitive pathogens. The product is intended for auricular and cutaneous use.

The product is produced and controlled using validated methods and tests, which ensure the consistency of the product released on the market.

It has been shown that the product can be safely used in the target species; the slight reactions observed are indicated in the SPC.

The product is safe for the user and for the environment, when used as recommended. Suitable warnings and precautions are indicated in the SPC.

The efficacy of the product was demonstrated according to the claims made in the SPC.

The overall risk/benefit analysis is in favour of granting a marketing authorisation.

The applicant has provided a detailed description of the pharmacovigilance system, which fulfils the requirements of Directive 2001/82/EC, as amended. Based on the information provided the applicant has the services of a qualified person responsible for pharmacovigilance and the necessary means for the notification of any adverse reaction occurring either in the Community or in a third country.

## II. QUALITY ASPECTS

### A. *Qualitative and quantitative particulars*

The product contains:

**Active substances:**

Miconazole nitrate	23.0	mg (equivalent to 19.98 mg miconazole)
Prednisolone acetate	5.0	mg (equivalent to 4.48 mg prednisolone)
Polymyxin B sulfate	0.5293	mg (equivalent to 5500 IU polymyxin B sulfate)

**Excipients:**

Silica, colloidal anhydrous

Paraffin liquid

The container is a dropper container of white, opaque LDPE with white, opaque HDPE screw cap in a cardboard box.

The product is an established pharmaceutical form and its development is adequately described in accordance with the relevant European guidelines.

### B. *Method of Preparation of the Product*

The product is manufactured fully in accordance with the principles of good manufacturing practice at a licensed manufacturing site.

The product is manufactured in accordance with the European Pharmacopoeia and relevant European guidelines.

### C. *Control of Starting Materials*

The active substances are Miconazole nitrate, Prednisolone acetate and Polymyxin B sulfate, established substances described in the European Pharmacopoeia. The active substances are manufactured in accordance with the principles of good manufacturing practice.

The active substance specifications are considered adequate to control the quality of the materials. Batch analytical data demonstrating compliance with these specifications have been provided.

Scientific data and/or certificates of suitability issued by the EDQM have been provided. All excipients are described in the current Ph. Eur. The ingredients and the production process of Auriotic 5,0 mg/0,5293 mg/23,0 mg/ml suspension have been checked for BSE/TSE safety. No ingredient was identified as substance of bovine, ovine or caprine origin. For this reason, there is no risk of transmission of spongiform encephalopathy (according to BSE/TSE Ph. Eur. Monograph) from the pharmaceutical use of this product.

### D. *Control on intermediate products (pharmaceuticals)*

Not applicable.

### **E. Control Tests on the Finished Product**

The finished product specification controls the relevant parameters for the pharmaceutical form. The tests in the specification, and their limits, have been justified and are considered appropriate to adequately control the quality of the product.

Satisfactory validation data for the analytical methods have been provided.

Batch analytical data from the proposed production site have been provided demonstrating compliance with the specification.

### **F. Stability**

Stability data on the active substances have been provided in accordance with applicable European guidelines, demonstrating the stability of the active substance when stored under the approved conditions.

Stability data on the finished product have been provided in accordance with applicable European guidelines, demonstrating the stability of the product throughout its shelf life when stored under the approved conditions.

An in-use stability of 3 months if stored below 25 °C is supported.

### **G. Other Information**

Shelf life of the veterinary medicinal product as packaged for sale: 2 years

Shelf life after first opening the immediate packaging: 3 months

## **III. SAFETY AND RESIDUES ASSESSMENT (PHARMACO-TOXICOLOGICAL)**

### **III.A Safety Testing**

#### **Pharmacological Studies**

Since the application is made in accordance with Article 13(1) of Directive 2001/82/EC, as amended, for a generic veterinary medicinal product, data on pharmacodynamics and pharmacokinetics are not required. The data submitted are in accordance with the requirements of the applicable European bioequivalence guideline.

#### **Toxicological Studies**

Since the application was made in accordance with Article 13(1) of Directive 2001/82/EC, as amended, for a generic veterinary medicinal product, this information is not required.

#### **User Safety**

The applicant has provided a complete User Safety Risk Assessment in accordance with the Guideline on user safety for pharmaceutical veterinary medicinal products (EMA/CVMP/543/03-Rev.1). The user safety warnings in the SPC are considered satisfactory.

## Environmental Risk Assessment

An environmental risk assessment according to VICH GL 6, Guideline on Environmental Impact Assessment (EIAs) for Veterinary Medicinal Products – Phase I (CVMP/VICH/592/98-FINAL) was provided by the applicant. The assessment stops at question 3 of the decision tree since the product will be used only in non-food producing animal species, *i.e.* cats and dogs. Therefore, an environmental risk assessment under Phase II following the VICH Topic GL38 (Ecotoxicity Phase II) is not necessary. Since the product is intended for use in cats and dogs the exposure of the environment to the product will be very limited. The product does not pose a risk to the environment when used as recommended.

## IV. CLINICAL ASSESSMENT (EFFICACY)

Since the application is made in accordance with Article 13(1) of Directive 2001/82/EC, as amended, for a generic veterinary medicinal product, this information is not required as it has already been presented for the reference product.

### IV.A Pre-Clinical Studies

#### Pharmacology

As this is a generic application according to Article 13, and bioequivalence with the reference product has been demonstrated, pharmacodynamic and pharmacokinetic studies are not required.

#### Tolerance in the Target Species of Animals

As this is a generic application according to Article 13, and bioequivalence with the reference product has been demonstrated, tolerance studies are not required.

#### Resistance

The information provided suggests that the intended target bacterial species are susceptible. Adequate warnings and precautions appear on the product literature.

### IV.B Clinical Studies

Since the application is made in accordance with Article 13 (1) of Directive 2001/82/EC as amended by Directive 2004/28/EC, on the basis of being a generic of a reference medicinal product, data on clinical efficacy are not required.

#### Laboratory Trials

As this is a generic application according to Article 13, and bioequivalence with the reference product has been demonstrated, laboratory studies are not required as they have already been presented for the reference product.

## **Field Trials**

The applicant has provided bibliographical data which show that the product is efficacious when used according to the SPC.

## **V . OVERALL CONCLUSION AND BENEFIT– RISK ASSESSMENT**

The data submitted in the dossier demonstrate that when the product is used in accordance with the Summary of Product Characteristics, the risk benefit profile for the target species is favourable and the quality and safety of the product for humans and the environment is acceptable.

## MODULE 4

### POST-AUTHORISATION ASSESSMENTS

The SPC and package leaflet may be updated to include new information on the quality, safety and efficacy of the veterinary medicinal product. The current SPC is available on the Heads of Veterinary Medicines Agencies website ([www.HMA.eu](http://www.HMA.eu)).

This section contains information on significant changes which have been made after the original procedure which are important for the quality, safety or efficacy of the product.
